What you want, when you want it

Always accessible through the internet, you can access your project at any time from any place. All you need is a laptop and an internet connection.

No need to meet

Reduce face to face meetings, save travel time and money. Cut down your carbon footprints!

Always up to date

No need to wonder if you're working at the latest version of a document: libraries allow you to check documents out and avoid change overlapping.

Secure

Access is secure through individual usernames and passwords. Authorised users can simply add, edit or delete site content using a web browser.

Workflows

Organise your work process and set up automated steps for your project to succeed. Set up alerts and automated emails to keep everyone informed.

Stay tuned

Get alerts any time a document or a list item is changed. Receive RSS feeds. Set up email flows to be generated automatically.

Task lists

Set up lists to assign tasks; follow up on completion percentage and goal achievement in real time.

Meet on the web

Compile meeting agendas, hold discussion forums, make announcements, post events, conduct surveys. Dedicated meeting can also be set up.

Keep track

Version history allows you to see who has done what and when. You can restore older versions of documents or list items, if needed.

Get started easily

Our solutions are based on Microsoft Office™ products; familiar layouts and ease of use minimise the learning curve.

Advantages

- The project is always available; all you need is a computer and a connection to the internet.
- No need to meet in person: save time, money and carbon footprints!
- Always access the latest version of any document, avoid not knowing if you are working at the good one!
- Have a clear overview of tasks
